

Hi-Flow Electric Diesel Pump

GEHF 12M (MANUAL), GEHF 12A (AUTOMATIC)

A reliable 12 volt high flow diesel pump designed to provide high flow diesel transfer, up to 75litres per minute. This unit has a continuous duty cycle, built in cooling fan and pressure relief valve.

FEATURES:

- Portable
- Self priming
- Built-in pressure relief valve
- Continuous duty cycle
- Built-in fan
- Vane style pump
- Consumption 35-53 amps
- Flowrate 75 L/min (free flow)
- Key lock start
- 1" BSP inlet/outlet thread
- 25mm (1") ID x 1.7m (5½ft) long suction hose
- 25mm (1") ID x 4m (13ft) long delivery nose
- 1" I/O x 4 m long delivery nose
- Manual or automatic nozzle
- Weight 11.9 kg
- 10 year parts availability
